|---------------------------------|---|--------------------------------|--|
| <b>Course Code &amp; Number</b> | CMPE 325-N  | <b>Course Title</b>            | Information Security and Cryptography  |
| <b>Type of Course</b>           | <input type="checkbox"/> Compulsory<br><input checked="" type="checkbox"/> Elective             | <b>Semester</b>                | <input checked="" type="checkbox"/> Fall <input type="checkbox"/> Spring <input type="checkbox"/> Summer                                 |
| <b>Course Credit Hours</b>      | (3+0+0) 3   | <b>Number of ECTS Credits</b>  | 5  |
| <b>Pre-requisite</b>            | CMPE 211 OR CMPE 114  | <b>Co-requisite</b>            |  |
| <b>Mode of Delivery</b>         | <input checked="" type="checkbox"/> Face-to-face<br><input type="checkbox"/> Distance learning  | <b>Language of Instruction</b> | <input checked="" type="checkbox"/> English<br><input type="checkbox"/> Turkish  |
| <b>Course Coordinator</b>       | Dr. Elif KURTARAN ÖZBUDAK   | <b>Course Lecturer(s)</b>      | Dr. Elif KURTARAN ÖZBUDAK  |
| <b>Required Reading</b>         | Understanding Cryptography: A Textbook for Students and Practitioners, Christof Paar, Jan Pelzl | <b>Recommended Reading</b>     | - Cryptography and Network Security, 7th Ed., William Stallings<br><br>- Cryptography: Theory and Practice. 4th Ed., Douglas R. Stinson. |

|                                   |   |
|-----------------------------------|---|
| <b>Course Catalog Description</b> | Security concepts, stream ciphers and random numbers, block ciphers and block cipher operations, modern crypto schemes; the Advanced Encryption Standard (AES), DES, RSA, Diffie-Hellman key exchange, Digital Signature Algorithms, Cryptographic Hash functions, Message Authentication Code, Protocols and key establishment methods, public-key infrastructure.   |
| <b>Course Objectives</b>          | The objective of this course is to provide the students the necessary knowledge about the basics of cryptographic algorithms, and utilize these algorithms in computing systems. Describe the use of cryptographic primitives to create secure systems, define and correctly implement cryptographic algorithms for the protection of information at rest and in transit. The students will be able to encrypt the information using symmetric and asymmetric encryption algorithms.  |
| <b>Course Learning Outcomes</b>   | Upon successful completion of this course, a student will be able to<br>1. Identify basics of cryptographic algorithms being used in information security.<br>2. Understand block ciphers and stream ciphers<br>3. Learn how to encrypt information using symmetric and asymmetric encryption algorithms.<br>4. Learn cryptographic primitives to provide integrity, availability and confidentiality.<br>5. Be able to combine basic knowledge with applicable methodologies to solve information security related engineering problems. |

| <b>Total Workload<sup>4</sup></b>   |   |           | <b>166</b>  |           |

<sup>1</sup> Multiple options possible.

<sup>2</sup> Multiple options possible. A percentage must be stated for the selected assessment method & criteria.

<sup>3</sup> Multiple options possible. The student workload is found by multiplying the number and duration (hour) of the activity involved.

<sup>4</sup> Computing the ECTS credits of a course: Total workload / 25 or 30 hours = ECTS credit and 1 ECTS credit = 25-30 hours

| <b>GRADING</b>   |
|--|
| <b>A. Midterm [25%]</b>  |
| One midterm exam that is worth 25% of the overall course grade.  |
| <b>B. Quiz [15%]</b>   |
| You will have 3 quizzes.   |
| <b>C. Assignments [20%]</b>  |
| You will be given 2 assignments and/or hands on activities to strengthen understanding of the topic.   |
| <b>D. Final Exam [40%]</b>   |
| One Final exam that is worth 40% of the overall course grade.  |
| <b>COURSE POLICIES</b>   |
| <b>Attendance</b>  |
| Attending is <b>NOT mandatory</b> , but strongly recommended. The quizzes and hands-on activities will be done in the lectures. If you would like to collect points for these activities, you need to attend the lectures.   |
| <b>Missed Work</b>   |
| Make-up exam will be done <b>only</b> for midterm and final exam, if the student can provide a legal document confirming a life threatening health issue at the time of the exam, or with the consensus of the CMPE faculty.   |
| <b>Late Assignment Submission Policy</b>   |
| Late submissions will be graded with penalty.  |
| <b>Extra Credit</b>  |
| Extra credits will not be offered.   |
| <b>Assignment Rules</b>  |
| All assignment works must be done individually. A student can submit only one work. In case of multiple submissions, only the latest submission will be considered. Students cannot submit work on other students' behalf.   |
| <b>Plagiarism</b>  |
| All of the following are considered plagiarism: <ul style="list-style-type: none"> <li>• turning in someone else's work as your own</li> <li>• copying words or ideas from someone else without giving credit</li> <li>• failing to put a quotation in quotation marks</li> <li>• giving incorrect information about the source of a quotation</li> <li>• changing words but copying the sentence structure of a source without giving credit</li> <li>• copying so many words or ideas from a source that it makes up the majority of your work, whether you give credit or not" (<a href="http://www.plagiarism.org">www.plagiarism.org</a>)</li> </ul> <p>Plagiarism is a very serious offense and will be penalized accordingly by the university disciplinary committee. The best way to avoid accidentally plagiarizing is to work on your own before you ask for the help of other resources.</p> |
| <b>Cheating</b>  |
| Cheating has a very broad description which can be summarized as "acting dishonestly". Some of the things that can be considered as cheating are the following:  |

- Copying answers on examinations, homework and laboratory works,
- Using prohibited material on examinations,
- Lying to gain any type of advantage in class
- Providing false, modified or forged data in a report
- Plagiarizing.
- Modifying graded material to be regraded.
- Causing harm to colleagues by distributing false information about an examination, homework or laboratory

***Cheating is a very serious offense and will be penalized accordingly by the university disciplinary committee.***

### **Class Readings**

Class readings are necessary but not mandatory. The material covered in class by your instructor will only provide a fundamental understanding of the general context.

| <b>TENTATIVE COURSE OUTLINE</b> |   |                                    |  |
|---------------------------------|---|------------------------------------|--|
| <b>Week</b>                     | <b>Topics</b>                             | <b>Readings</b>                    | <b>Assignments, quizzes, and exams</b> |
| <b>1</b><br>26-30 September     | Introduction to Cryptography              | Chapter 1.1, 1.2, 1.3              |  |
| <b>2</b><br>3-7 October         | Modular Arithmetic and Historical Ciphers | Chapter 1.4                        |  |
| <b>3</b><br>10-14 October       | Stream Ciphers and Random Numbers         | Chapter 2.1, 2.2.2.1, 2.2.2, 2.2.3 |  |
| <b>4</b><br>17-21 October       | Block Ciphers and DES                     | Chapter 3.1, 3.2, 3.3, 3.4, 3.5    |  |
| <b>5</b><br>24-28 October       | Advanced Encryption Standard              | Chapter 4.1, 4.2, 4.3, 4.4         | Assignment 1                           |
| <b>6</b><br>31 Oct.-1 November  | Block Cipher Operations                   | Chapter 5.1.1, 5.1.2, 5.1.3        |  |
| <b>7</b><br>7-11 November       | Introduction to Public-Key Cryptography   | Chapter 6.1, 6.2                   |  |
| <b>8</b><br>14-18 November      | Number Theory for Public-Key Cryptography | Chapter 6.3                        | Midterm                                |
| <b>9</b><br>21-25 November      | RSA Cryptosystem                          | Chapter 7.1, 7.2, 7.3, 7.4         |  |
