Design and Research Agenda of Studio 102 & 112

The sense of sustainability idea has emerged since 1980's. From that moment, the physical environment and the social construction aspect were seperated into two according to a distinct general heading. Based on this idea, the United Nations has defined seventeen sub-headings on a universal scale. In the context of the sustainability goals below, studio instructors expect civil workspaces to be designed for matched various corporate identities. Scenario design, user group, the location of the civic office will be randomly pick by the students thus, research, idea development and spatial atmosphere development steps will be followed.

TED ANKARA COLLAGE FOUNDATION, CENTER for GENDER STUDIES (TEDU), TEMA FOUNDATION, UNICEF, GREENPEACE, AFAD, AHBAP, UNITED NATIONS, MINISTRY OF AGRICULTURE AND FORESTRY, CHANGE.ORG. ETC.

First week lessons will be directly related to the research agendas.
