2024

GRADUATES

TED UNIVERSITY

Vision

TED University aims to be inspiring and unique in providing a transforming and liberating educational experience; and produce knowledge and create solutions through interaction with the city and the society.

Mission

TED University carries the mission of fostering graduates that are creative, critical-minded, self-confident, well-rounded lifelong learners by using innovative teaching methods and curricula that have a proper depth-to-breadth balance required by global knowledge economies. TED University, which holds pride in being transparent, accountable and trustworthy, is and will always be a learning institution aiming at continuity and sustainable development and at contributing to the world of science by generating new knowledge through a wide range of scholarly research and creative efforts in focus areas of institutional priority.

Core Values

*Respect for ethical values,
Integrity, solidarity and mutual respect,
Progressive and secular institutional position,
Excellence in teaching and research,
Robust and integrated quality culture,
Partnership and cooperation spirit,
Stakeholder participation,
TED tradition.*

Cap Throwing

The newest member of our TEDU Alumni Family,

You have come to the end of a seemingly challenging but enjoyable journey and your real journey will begin now. The sleepless nights, the final exams and the endless reports you have experienced so far will take their place in your mind as pleasant memories. The friendships you have made during this process will last a lifetime, and your professors who have touched you with their knowledge will be proud of your achievements.

In these challenging times, you focused on your studies, did not give up and managed to graduate. Now you will carry the fire of struggle burning inside you for life. Thanks to this fire, you will be able to face all the difficulties of life, and you will be able to find your way in difficult times thanks to this fire. Because TEDU students do not give up, do not stop working until they succeed, and eventually achieve victory. As the TEDU family, we are proud of you for your determination.

You are stepping into a very different world compared to the past. Business life has changed, as have today's conditions. We are in the days when it is not only the smart or hardworking ones who rise, but also the ones who can adapt. The people who can be successful today are those who can adapt to change, and the people who will shape the future are those who can foresee the consequences of change and have a vision by combining different inputs. TEDU has taught you to be versatile, to look at things from different perspectives, and most importantly, to adapt. Now, it is up to you to dominate the future by working hard.

Don't be afraid to make mistakes on this path. The perfect is the adversary of the best. Don't waste opportunities and progress for the sake of perfect work. Thanks to the imperfections you will make in your work, you will produce perfect work over time. Your mistakes will play the biggest role in your development. Every successful person has debris left behind. Those people have reached their present success by learning from their mistakes. Because you never forget the lessons learned from mistakes.

You will not only have to work hard for your dreams, you will have to work smart. As artificial intelligence becomes more widespread and slowly integrated into modern life, the knowledge and achievements available to you have taken on a new dimension. Think about how you can use the tools that have always been open to you by fusing them with each other. Think about what you can produce with their combination, not just using a software or a tool. Because if you want to be ready for the future, you need to think and work outside the box, in an integrative and big picture way.

Just as you need to be integrative in your studies, you should apply the same philosophy in your social life. Although life has pushed us to be individualistic, never forget that there is strength in unity. As TEDU graduates, we have grown up from very different backgrounds, but we have gathered under one roof and now share a common story. When you enter business life, you will realize how challenging and lonely life is. That is why we, as TEDU

graduates, must look out for each other. We should carry our university environment, which we experience as a big family, to our graduate life and act in unity. As long as we look after each other, there is no challenge that we cannot overcome.

Remember that our family is much bigger than the friends sitting next to you today. We are part of the Turkish Education Association, one of the longest-established institutions of the Republic of Turkey, entrusted to us by Gazi Mustafa Kemal Atatürk. We are a community spread all over the country, striving to be beneficial to our country and its environment, supporting each other from the best day to the worst day, and acting in unity. We will walk in line with Atatürk's principles and in the light of the torch he lit, we will walk arm in arm, no matter how difficult the road may seem.

Welcome aboard, the newest members of our family.

On behalf of TEDU Alumni Association,

Batuhan ÖNDER
TEDU Alumni Association President

Dear Graduates,

Today is an important milestone for you. You are opening a new chapter in your lives, rewarded for your years of hard work, sacrifice and perseverance. You are successfully passing through a difficult process and taking an important step into the future.

I sincerely extend my congratulations to you on this happy day.

I also congratulate your families, friends and loved ones. We know how proud and happy they are of you. Their love, patience and sacrifices are the biggest reasons why we are here today.

I would also like to express my gratitude to all our academic and administrative staff who provide you with world-class quality education at TEDU.

As TED University, we are proud to be an institution that is getting stronger day by day, mobilizing all its resources and opportunities for its students and making extraordinary efforts to educate its students in the best way possible, despite the fact that we have only recently started our academic life. You are graduating today as a lucky member of this huge family.

May the bond between us never break. As a TEDU student, continue to follow our University on all platforms in order to follow and be informed about new developments at our University. Become a member of the Alumni Association and even take an active role. Think about the first time you walked into TEDU, the first student who first contacted you during the introduction days. Now you are alumni who will inspire young people who are experiencing their first university excitement with your career journey. That's why it is so important to stay in touch, please remember this.

As we send you off on a new adventure, I would like you to keep a few suggestions in mind. Be flexible and open, adapt to change. Let life transform you. Be entrepreneurial, don't be afraid to make mistakes and fail. Try, fail, learn. Do not hesitate to take risks. Dream, push your imagination to the limit. Your dreams and goals may change. But keep on dreaming all the time.

Remember that you are very valuable for yourself, for your family and for this country. We need young people like you. You have the power and equipment to make the world a better place. I believe in you very much.

On behalf of the TED community, I wish you all success in this long journey of life in which we will be proud of your achievements.

I embrace you all with love.

Prof. Dr. İhsan Sabuncuoğlu
TED University Rector

Dear Graduates,

Founded in 1928 by the founders of our Republic under the guidance of our Great Leader Mustafa Kemal Atatürk, the Turkish Education Association celebrates its 96th anniversary this year. We are a huge family with our 46 schools, the thousands of children we have given hope to through our scholarship programs, our think tank, alumni, volunteers, teachers and academic staff across Turkey.

When we founded TEDU, the last member of this great family, we set out to “make a difference”. It was very important for us to show that innovative approaches in higher education, world-class education and a different university are possible. The most important proof that we are on the right track is you, our graduates, and the young people who have achieved success under the roof of TEDU. It is a great honor for us to raise creative, curious and free-thinking young people who have internalized our national values and follow the developments in the world. As the TED Family, we are grateful to our parents who trust us and to you, our esteemed students, who carry the TED brand forward with their personalities, achievements and self-confidence.

By choosing TEDU for higher education, you have made success, continuous development and forward thinking a priority in your lives. Today, you are stepping into a new world with these priorities and we are proud of you.

We are confident that in the future you will make us feel that you are a part of a giant mountain, the Turkish Education Association Family. We have no doubt that you will contribute to the construction of a modern and strong Turkey and to our country playing a more active role abroad.

Remember, the diploma you received is far beyond an academic achievement. Your responsibilities will continue to multiply from now on, just as they did during your education.

I extend my congratulations to you and wish you continued success and all the best.

Happy to have you as a TED member,

With all my love,

*Selçuk Pehlivanoglu
TED University
Chairman of the Board of Trustees*

On behalf of the class of 2024, I would like to welcome the respected rector, honourable board of trustees, esteemed professors, families, staff, guests and alumni.

My name is Salma Naciri and I am from Morocco. It is a privilege to stand before you today and it gives me great joy to be able to celebrate my achievement with you.

Before speaking of my success, I would first like to thank those without whose guidance and support none of it would have been possible. I thank my family, especially my parents mama and baba, my sister Asmaa and my brother, who helped me along every step of my journey. I thank my esteemed professors: Associate Professor Başak Ağın, Assistant Professor, Michael Sheridan and Associate Professor Taner Can, for their guidance and patience. I also thank all the professors from my department and beyond, all the administrative and academic staff who helped create a positive and safe environment for all students and especially internationals who leave their families and homes behind.

Indeed, to have the honour of standing here today, each one of us graduates goes through a path of growth that goes beyond academic education and extends to self-discovery.

My university experience has been ripe with obstacles. Obstacles that range from academic stress and deadlines to managing life in a new country & managing life in the aftermath of a global pandemic. Today, my fellow graduates and I celebrate that in overcoming all these obstacles, we honed many skills that I believe will prepare us for life after university, as future leaders in an ever-changing world that requires flexibility and open-mindedness.

In my journey from my first day at TEDU as a young girl fresh out of high school and full of uncertainty to a graduate with bright prospects and a rich education, I learnt that passion and perseverance are the key to success. So, my advice to the younger students and in fact a reminder to myself and the graduates as well is that we never waver in our commitment to our ambitions regardless of the uncertain circumstances. Our future is in our hands and we should strive to build one of equality & prosperity.

I congratulate all the graduates & wish them luck in their next chapters; I thank my professors who made me feel valued and welcomed throughout my 4 years stay in Türkiye. I thank the Moroccan ambassador for his valuable presence today, which supports the big Moroccan community of students here at TEDU. I thank all the staff of TEDU. And last but not least I thank my parents and my family again whose unwavering support is why I stand here today and to whom I dedicate my success.

Thank you.

*Salma Naciri
Co-valedictorian*

To the esteemed faculty of TED University, my classmates and my friends....

Hello everyone and Thank you so much,

Today I stand here with pride in all that I have achieved and gratitude for all that Allah has bestowed upon me .

But this pride is not mine alone to share, I have a lot of people I need to Thank. People who have helped me and supported me and people without whom I would not be here.

Ever since I was a child, words that were buried in me had a hard time coming out of my mouth. And that's why I often have not been to thank the people I love.

So today, Thank you to everyone who has supported me in this journey.

Firstly, my faculty which has persistently seen the best in me and has made this possible. Special Thank you to Micheal Hocam for always giving the best lectures and being open to discussion about all the ideas I harbor.

To my friends both back home and especially here, Thank you for believing in me. To Ali and Azca, two people that have become my family here and who believed I would become the Valedictorian, way before I could have believed it myself. To Aiza, for always listening to me rant and keeping me sane.

To Apo who has always been there for me every step of the way, even when we are physically miles apart. And who I know will always have my back, even if I mess up.

And Thank you to my family, my mama who has worried for me consistently in these past 4 years, my grandparents whose prayers have led me here today and Finally, saving the best for the last, I want to thank my father, the best man I know.

Growing up in a patriarchal family where female education was often discouraged, let alone the idea of sending a daughter to study abroad, his support has been invaluable. He stood up for me in front of everyone and went against all those who hindered the way. He made me feel worthy as a woman, and stands in front of me like a shield whenever need be. I hope I have made you proud, baba.

My father had the courage to break the cycle of toxic patriarchy, and change minds, and for that I am extremely grateful to him. Not only because I stand here today but because this has been the most important lesson I have learned in my life.

Cycles can be broken, all you need is a little courage.

So, to impart the very little wisdom I have, this is my message "Spirals grow infinitely small the farther you follow them inward, but they also grow infinitely large the farther you follow them out."

Today, we all close a significant chapter of our lives, yet many more lie ahead of us, each filled with its own mix of happiness and sorrow. As we embark on these new journeys, we may sometimes find ourselves trapped in cycles of toxicity, violence, or failure.

However, it's essential to remember that cycles, no matter how entrenched they seem, can be broken. My father broke the cycle of patriarchy, I try everyday to break the ones that I find myself caged by.

It takes a lot of heart and a little hard work but with perseverance, we can turn our efforts to climb up each spiral that our lives put us in. With every step, no matter how small, let's ascend, turning adversity into achievement and transforming our lives and the one's around us.

So Today, as we leave the familiar halls of academia, let us carry forward the lessons we've learned not just from our textbooks, but from the people who have shaped us. Let us honor the sacrifices and the bold decisions that allowed us to be here, and let us strive to break our own cycles of limitation and expectation.

Here's to embracing our journeys, to the endless possibilities they present, and to the extraordinary adventure ahead.

Congratulations to the class of 2024!

Thank you.
