# Spring 2022 MATE 402 Philosophy of Mathematics

Instructor: Dr. Elçin Emre-Akdoğan	Place: F221
Office Hours: by appointment	Textbook: Lecture Notes
Office: GB24	Program: -
Email: <u>elcin.akdogan@tedu.edu.tr</u>	<b>Time:</b> Thursday 16:00-18:00

# **Course Description:**

- Ontology and epistemology of mathematics;
- Numbers, sets, functions, etc. mathematical concepts with proposition and the meaning of mathematical expressions;
- Fundamentals of mathematics, methods and philosophical problems related to the nature of mathematics, objectivity in mathematics and applicability to the real world;
- Studies of pioneers of philosophy of mathematics, such as Frege, Russel, Hilbert, Brouwer and Gödel;
- Flatness and dimension concept, basic theories of mathematics philosophy;
- Logicism, formalism and intuitionism. Semi-experimentalists and Lakatos;
- The relationship between mathematics philosophy and mathematics education;
- Social groups in the philosophy of mathematics education.

# **Course objectives:**

The aim of this course is to provide students understanding of basis of philosophy of mathematics. Dealing with different perspectives, students will have a chance to learn about ontology and epistemology of mathematics, objectivity of the field, meaning of mathematical expressions and theories of philosophy of mathematics.

# **Learning Outcomes:**

Upon successful completion of this course, the student should be able to:

- Collaborate on ontology and epistemology of mathematics.
- Discuss the meaning of mathematical expressions.
- Elaborate on fundamentals, methods and nature of mathematics.
- Critique objectivity in mathematics and applicability to the real-world situations.
- List pioneers of philosophy of mathematics.
- State basic theories of philosophy of mathematics.
- Integrate basis of philosophy of mathematics and mathematics education.

**Methods for Assessment of Learning Outcomes:** The expected learning outcomes for the course will be assessed through graded activities and ungraded activities. The graded activities include assignments, in-class activities, and project. The ungraded activities will be used to monitor your progress. A variety of these ungraded assessment techniques may be employed, including activities to be completed during class, direct questioning of students, answering students' questions in class, and discussions during office hours.

**Assignment:** You need to upload your assignments to moodle, your document's title should be NAME\_SURNAME\_ Assignment -X (X: number)

Each assignment will be graded on a scale of 0-10.

**In-class activities:** You need to upload your in-class activities to moodle, your document's title should be NAME\_SURNAME\_In-Class Activities-X (X: number)

Each in-Class activities will be graded on a scale of 0-10.

#### **Project:**

Both of your document's title should be NAME\_SURNAME\_Project

**Attendance:** This course requires strong involvement and attendance. You are responsible for all information given out during the courses. Exceeding 20% of attendance with unexcused absences will result a half letter grade reduction. You are expected to arrive on time for the lectures.

**Communication:** All announcements will be sent to your e-mail address through Moodle. Check your e-mails regularly in order to be informed.

Grades: Your final grade will be weighted as follows:

20 points	In-Class Activities	Details will be given during class	Individual Work
40 points	Assignments	Details will be given during class	Individual Work
20 points	Project	Details will be given during class	Group Work

# **Readings:**

Alexander George and Daniel Velleman, Philosophies of Mathematics, 2002, Blackwell Publishers.

Academic Honesty: It hardly needs to be said that such things as plagiarism or stealing another student's work are unacceptable. However, in this class, it is entirely proper to work in teams to do discussion on the problems or the problem solving, as long as you yourself have mastery of those answers and are prepared on your own to present them in class. Plagiarism is a serious breach of academic trust. In academic work, our words and ideas are the value of our work, so turning in someone else's work as if it were your own is a form of theft. When you use someone else's words and ideas--whether it's the work of a famous writer or a fellow student--without crediting the source or authorship of those words and ideas, you are plagiarizing. So here's the bottom line: original work only, credit to ideas, writing, or words from someone other than you.

# **STUDENT SERVICES INFO:**

#### o Specialized Support and Students with Disabilities

Students who may require specialized support due to a disability affecting mobility, vision, hearing, learning, mental or physical health should consult with Specialized Support and Disability Coordinator, Asst. Prof. Emrah Keser E-mail: emrah.keser@tedu.edu.tr, or visit the website at https://www.tedu.edu.tr/tr/main/engelsiz-tedu

#### o Student Counseling Centre

The Student Counseling Centre is a service mandated with providing crisis intervention and supportive listening services to the campus community. A major part of fulfilling that mandate is raising awareness of our service so that students know they are never alone in dealing with problems. For further information and/or questions, you can contact Sıla Deniz Beyarslan, sdeniz.beyarslan@tedu.edu.tr, Office 165, or visit SCC website at http://csc.tedu.edu.tr/

#### o TEDU COPeS

TED University Coronovirus Psychosocial Support Team was established in order to facilitate coping with the psychological, social, familial, academic, and professional difficulties that may arise due to adverse conditions associated with COVID-19 pandemic for TEDU students and employees. TEDU COPeS aims to provide psychosocial support for TED University students and employees during the coronavirus outbreak. To this end, the team aims to provide support at the early stages of a possible crisis, activate and strengthen your coping strategies, and provide information on support resources. For further information and/or questions, visit their website at <a href="https://copes.tedu.edu.tr/">https://copes.tedu.edu.tr/</a>

Note: This syllabus is tentative, and should only be used to give a rough guide to the course schedule. Additional readings may be assigned, and dates may be changed if necessary.

SCHEDULE				
Date	Торіс	Content		
Week 1	Introduction	Introduction of the syllabus		
Session 1				
(17/02/2022)				
Week 2	Philosophy of Mathematics	Introduction of the Philosophy of Mathematics		
Session 1				
(24/02/2022)				
Week 3	Philosophy of Mathematics	Ontology and epistemology of mathematics.		
Session 3				
(03/03/2022)				
Week 4	Philosophy of Mathematics	Logicism, formalism and intuitionism		
Session 1				
(10/03/2022)				
Week 5	Philosophy of Mathematics	Logicism, formalism and intuitionism		
Session 1				
(17/03/2022)				
Week 6	Philosophy of Mathematics	Logicism, formalism and intuitionism		
Session 1				

(24/03/2022)			
Week 7	Philosophy of Mathematics	Studies of pioneers of philosophy of mathematics, such as	
Session 1		Frege, Russel, Hilbert, Brouwer and Gödel;	
(31/03/2022)			
Week 8	Philosophy of Mathematics	Studies of pioneers of philosophy of mathematics, such as	
Session 1		Frege, Russel, Hilbert, Brouwer and Gödel;	
(07/04/2022)			
Week 9	Philosophy of Mathematics	Set Theory	
Session 1			
(14/04/2022)			
Week 10	Philosophy of Mathematics	Set Theory and the Continuum Hypothesis.	
Session 1			
(21/04/2022)			
Week 11	Philosophy of Mathematics	Developing the Natural Numbers	
Session 1			
(28/04/2022)			
Week 12	Philosophy of Mathematics	G odel's Incompleteness Theorem	
Session 1			
(05/05/2022)			
Week 13	Philosophy of Mathematics	Philosophical Implications of Incompleteness.	
Session 1			
(12/05/2022)			
Week 14	HOLIDAY!!		
Session 1			
(19/05/2022)			
Week 15	Philosophy of Mathematics	Exit Ticket Activity	
Session 1			
(26/05/2022)
